

Turbine Conversions, Ltd

Single Point Fueling

TURBINE CONVERSIONS SINGLE POINT FUEL

Our Single Point Fueling System surpasses all others in the marketplace by offering the only “Fuel Level Control” system. The TCL Single Point Fueling (SPF) is the only FAA approved system for all Ag Aircraft. Our system is the Cadillac of Single Point Fueling Systems and is saving pilots time and money around the world! Also approved in Canada.

Features

- Automatic Fuel Level Control
- Automatic Shut Off
- Pressure Control Feature
- Adapts easily for fuel systems from 1" to 2"
- Components corrosion protected and powder coated for added durability
- Separate valves for left and right tanks, insures both tanks fill completely
- Sealed box prevents contamination of fuelling dry break when not in operation
- LED Indicator shows valves open and system power
- Dual controls and indicators for Pilot and Ground Crew
- Allows for partial fill of fuel tanks with minimum fuel circuit
- Low Fuel Warning
- Auto Locks available as an add on feature

Benefits

- No climbing on Wings – increased safety of Ground Crew
- Quick Refueling – Shortens time on Ground
- BLM Approved for "Live Fueling"
- Simultaneous load/fuel possible
- No risk of over filling
- Eliminates risk of over pressurization of fuel tanks
- Experienced installers at Yorkton Aircraft Service
